Selected Projects

ELITERIDE

Logo & Key Visual

Elite Ride is a premium transportation service specializing in high-end passenger transport. The brand is dedicated to providing an exclusive, comfortable, and luxurious travel experience for its clients.

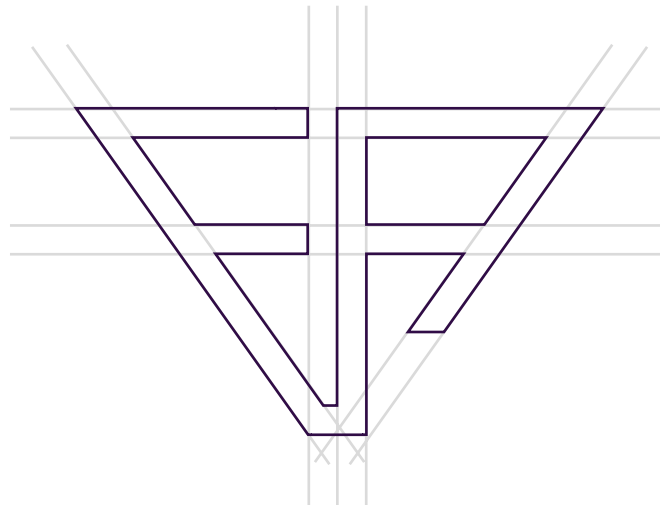

ELITERIDE

Logo & Key Visual

The logo design features the initials E and R, representing Elite Ride, seamlessly integrated within the shape of a diamond. The diamond symbolizes prestige, luxury, and excellence, aligning with the brand's commitment to top-tier service.

Purple is associated with luxury, prestige, and premium experiences.

**ELITERIDE**

Akrybia

Logo Design Project

Akrybia is a company specializing in road signage services, including installation, maintenance, and servicing of traffic signs. The brand is dedicated to ensuring safety and efficiency in road infrastructure through high-quality and professional solutions.

Akrybia

Logo Design Project

The logo design features a fusion of two traffic signs: A warning sign (typically triangular) to symbolize alertness, safety, and caution. An informational sign (typically rectangular or square) to represent guidance, clarity, and professionalism. This combination reflects Akrybia's expertise in both the installation and servicing of road signs, emphasizing the company's commitment to safety and reliability.

MUELLE SOLUTIONS

Logo Design

The logo for Muelle Solutions was designed for a company specializing in the manufacture of loading dock ramps. The main goal of the project was to combine functionality, strength, and a modern industrial character, clearly reflecting the company's field of expertise.

MUELLE SOLUTIONS

Logo Design

The graphic symbol is based on a geometric form inspired by the structure of loading docks and ramps. The mark visually references the perspective of entry and forward movement into a warehouse space, emphasizing logistics, precision, and the reliability of the company's solutions.

Halmar Baltika

Conceptual Logo Design Project

Halmar Baltika operates in the furniture sales industry, offering high-quality and stylish furniture solutions. The brand focuses on modern design, functionality, and craftsmanship, catering to customers looking for aesthetically pleasing and practical furnishings.

Halmar Baltika

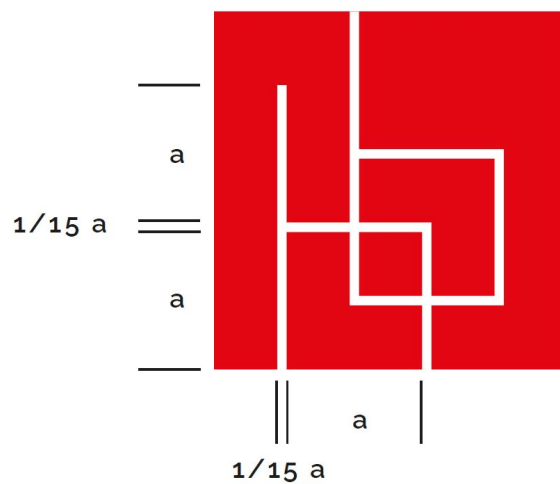

Conceptual Logo Design Project

The logo design incorporates the first two letters, „H” and „B”, creatively shaped to reflect linear furniture forms. This approach symbolizes:

Structural design, representing the framework and craftsmanship of furniture.

Simplicity and elegance, aligning with modern and minimalist aesthetics in furniture design.

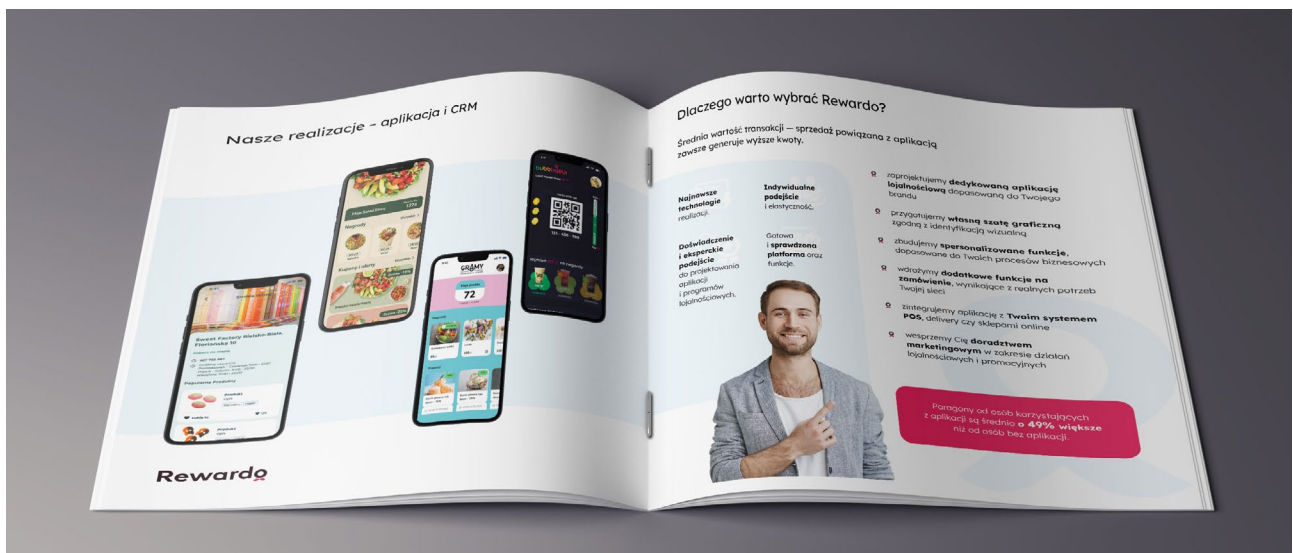

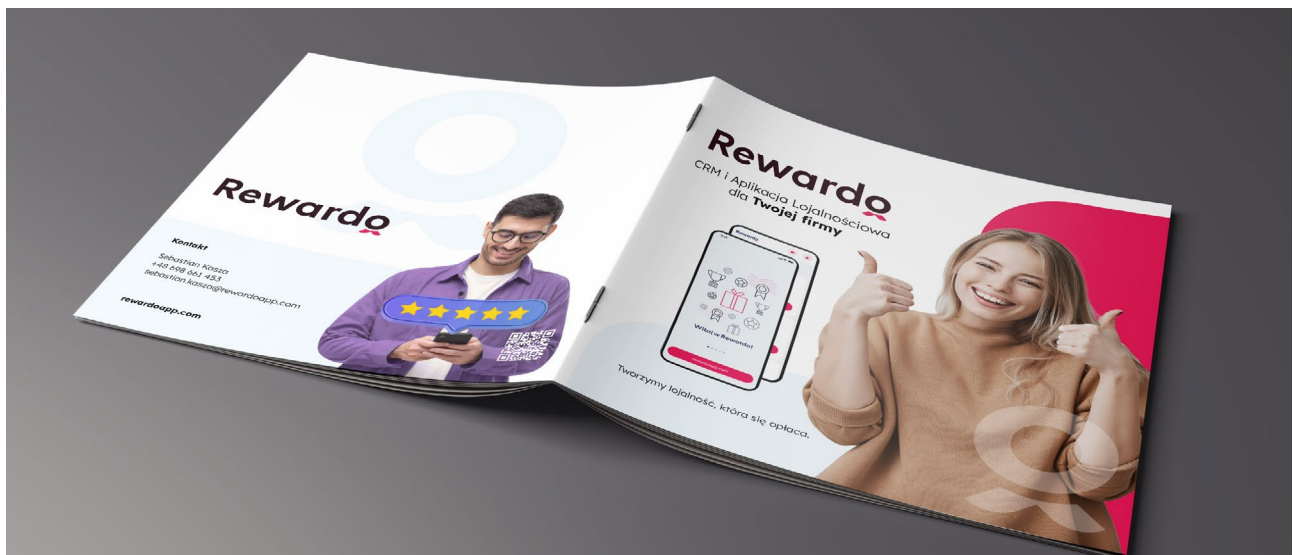

Functionality, ensuring the logo remains versatile and easily recognizable across various branding materials.

Rewardo

Brochure design

Promotional catalog design for Rewardo – a CRM and loyalty application for businesses. The goal was to create a modern and clear publication that presents the offer in an engaging way while highlighting the value of building strong customer relationships.

Rewardo

Brochure design

The design is based on a minimalist layout, consistent visual identity, and bold typography supported by lifestyle imagery. The catalog was prepared for print and use in sales and marketing materials.

ML System

Insulated Glass Units, Laminated Glass, and BIPV

This catalog showcases a wide range of projects featuring insulated glass units (IGUs), laminated glass, and BIPV technology. It has been designed to highlight the innovation and functionality of glass solutions used in modern architecture.

ML System

Insulated Glass Units, Laminated Glass, and BIPV

Clear presentation of projects – demonstrating the versatility of applications in commercial, residential, and industrial buildings. This catalog is the result of attention to detail and a modern approach to showcasing products and their applications. It serves as an inspiring tool that helps architects, designers, and investors select the best solutions for contemporary architecture.

PhotonWall

Brochure design and product photography

This catalog presents a diverse range of projects featuring PhotonWall – photovoltaic facade panels inspired by nature. Designed to combine aesthetics with sustainability, PhotonWall solutions seamlessly integrate renewable energy generation with architectural beauty.

PhotonWall

Brochure design and product photography

Aesthetic and functional layout – ensuring an engaging visual experience that enhances readability and highlights the innovative character of PhotonWall panels.

MC Design

Brochure design

This brochure presents a comprehensive range of services and products offered by advertising agency. Designed to highlight expertise in branding, digital marketing, graphic design, and advertising solutions, it provides a clear and visually engaging overview of how we help businesses grow and stand out.

MC Design

Brochure design

Crafted with an eye for design and clarity, this brochure serves as both an introduction to our agency and an inspiration for businesses looking to elevate their brand presence.

Agrovoltaica

Brochure design

This catalog presents innovative Agrovoltaica solutions, showcasing how photovoltaic technology can be integrated into agricultural environments to enhance sustainability and energy efficiency.

Agrovoltaica

Brochure design

Designed to highlight the benefits and applications of agrivoltaics, this publication provides a clear and visually compelling overview of modern solar solutions for farms and agribusinesses.

Metalografika

Bruchure design

This catalog provides a comprehensive overview of Metalografika and Chemigrafika solutions, showcasing high-quality cast medals, pins, and commemorative plaques. Designed to highlight craftsmanship, durability, and artistic precision, this publication serves as a guide to our wide range of custom metal products.

Metalografika

Rollup design

Roll-up banner is designed to visually represent the craftsmanship and expertise of Metalografika, showcasing its engraved and cast metal products in a clear and impactful way.

Rewardo

Rollup design

Roll-up banner design for Rewardo – a CRM and loyalty application for businesses. The goal was to create a clean and eye-catching visual that clearly communicates the brand's value at a glance.

Rewardo

Rollup design

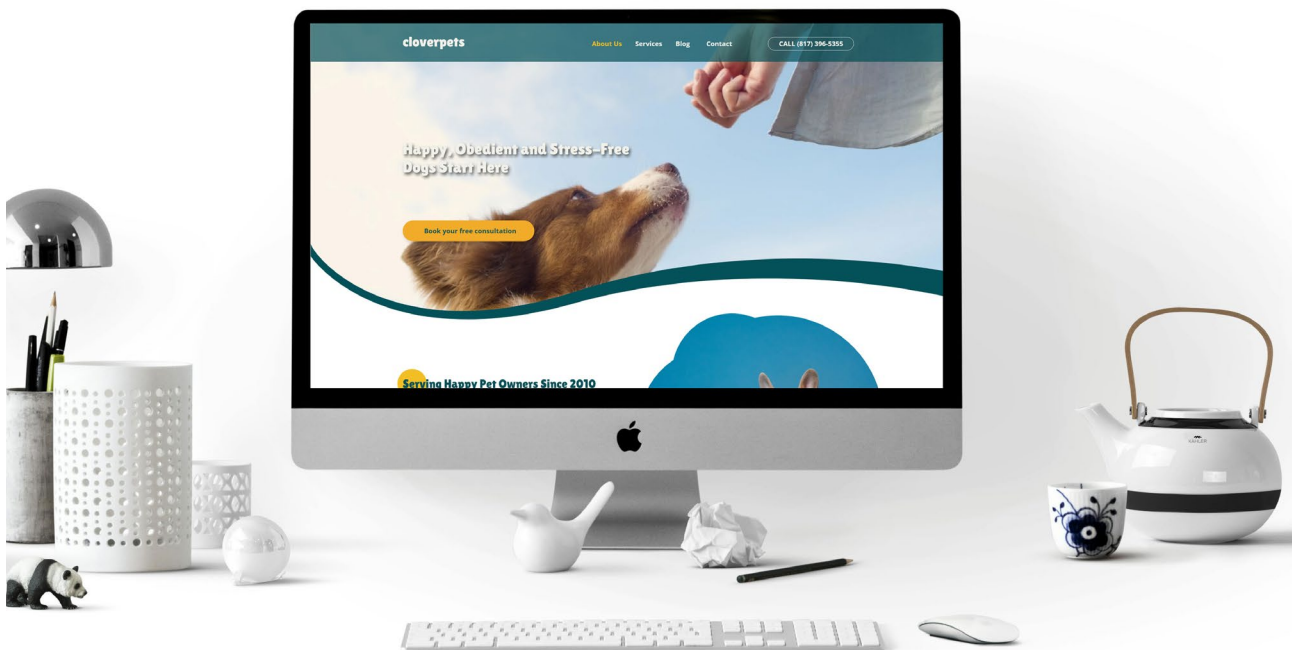

The design focuses on strong branding, bold typography, and friendly lifestyle imagery to attract attention in trade show and sales environments. The layout was optimized for large-format print and high visibility from a distance.

CloverPets

Web Page Design

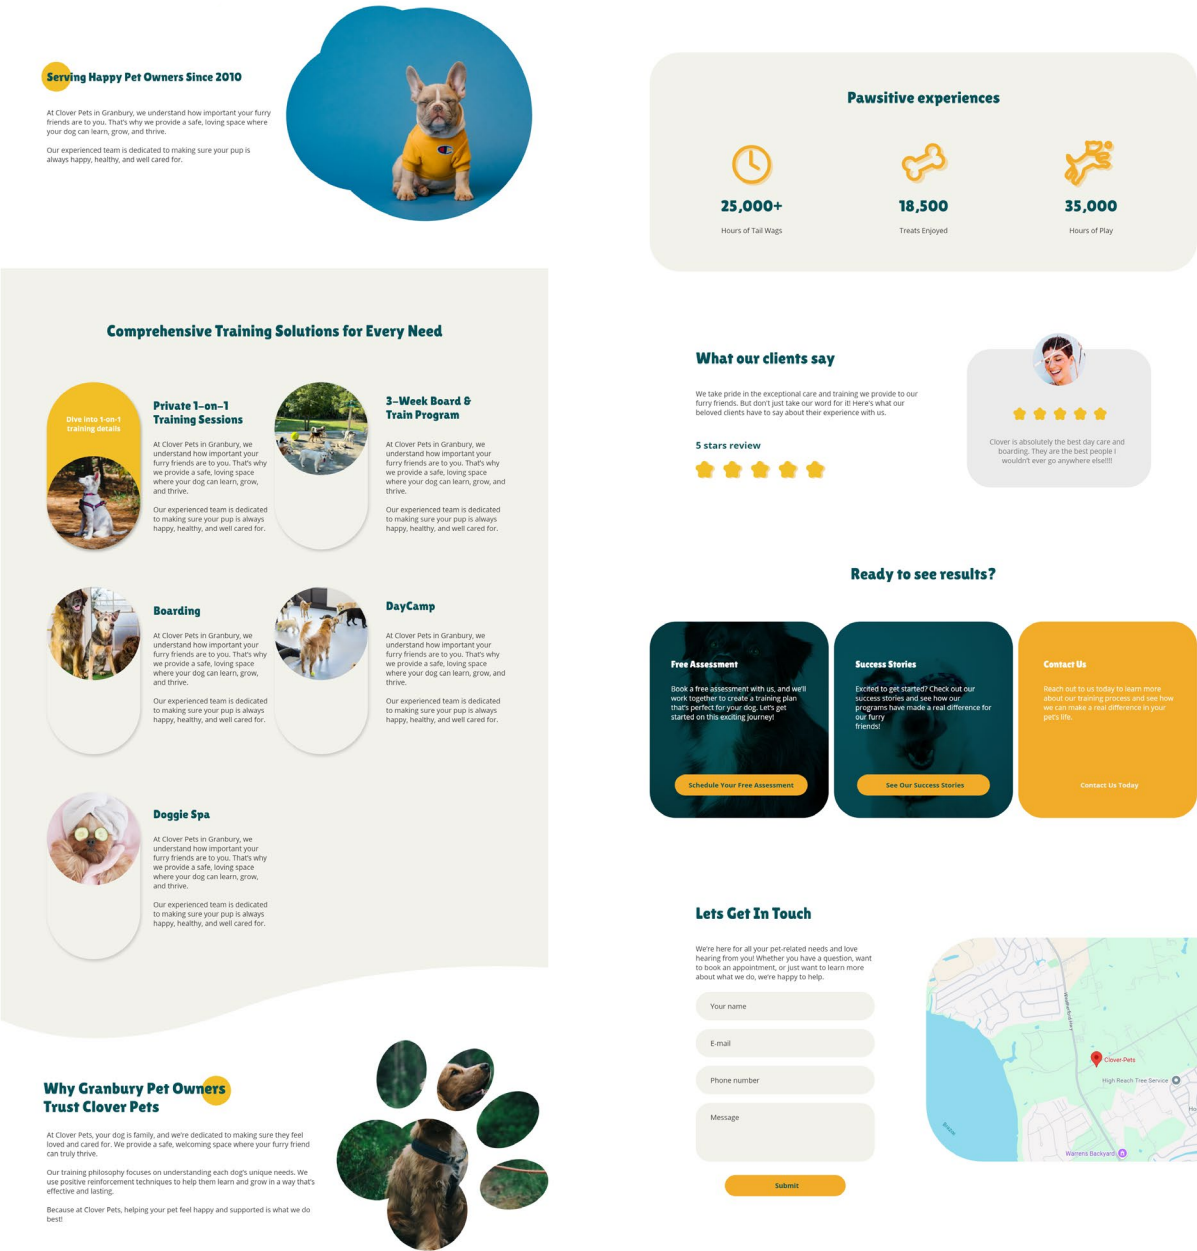

The Clover Pets Contact Page is a clean and user-friendly web page designed to facilitate seamless communication between customers and the company. The page follows a modern, minimalist aesthetic with an intuitive layout, ensuring an effortless user experience.

CloverPets

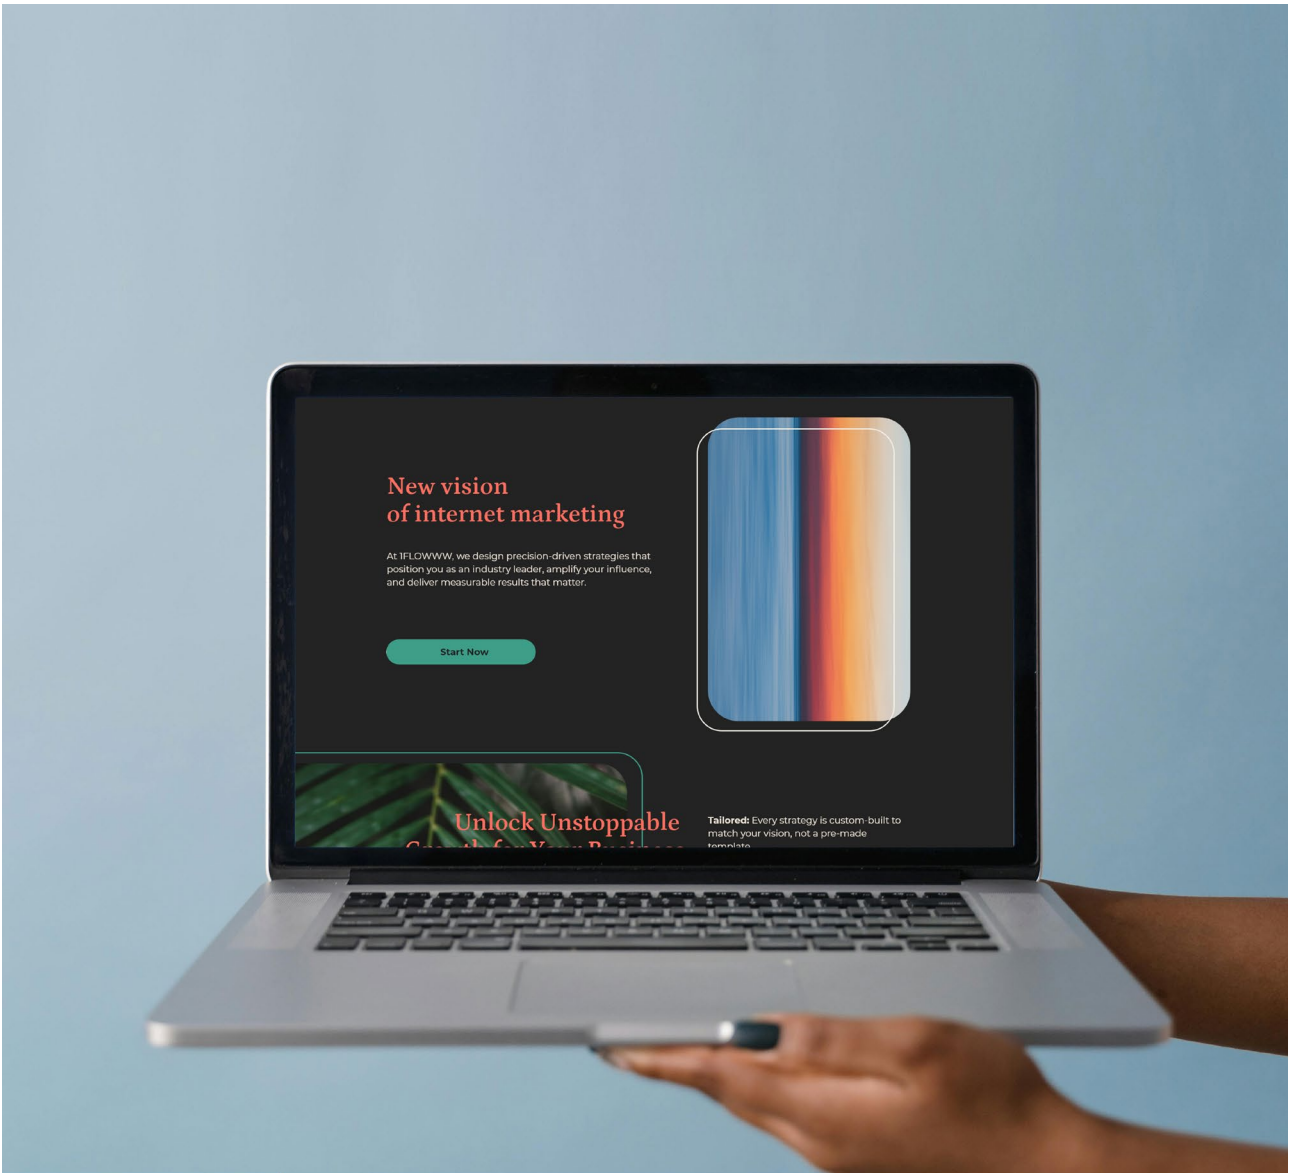

Web Page Design

This project highlights ability to create user-centered designs that prioritize accessibility, clear communication, and aesthetic appeal while serving the needs of both the client and their audience.

1flowww | Corporate Page
Web Page Design

The 1Flowww website is a sleek, modern platform designed to showcase the agency's SEO services and expertise.

1flowww | Corporate Page

Web Page Design

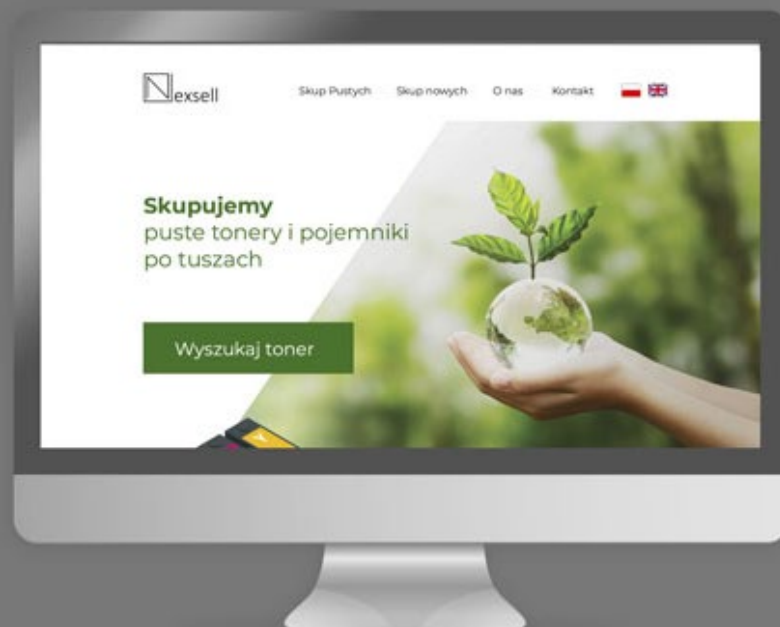

Aimed at potential clients looking for digital marketing solutions, the website is built with an emphasis on user experience, clear communication, and a professional design that highlights the agency's capabilities in SEO optimization.

Nexsell | In1

Web Page Design

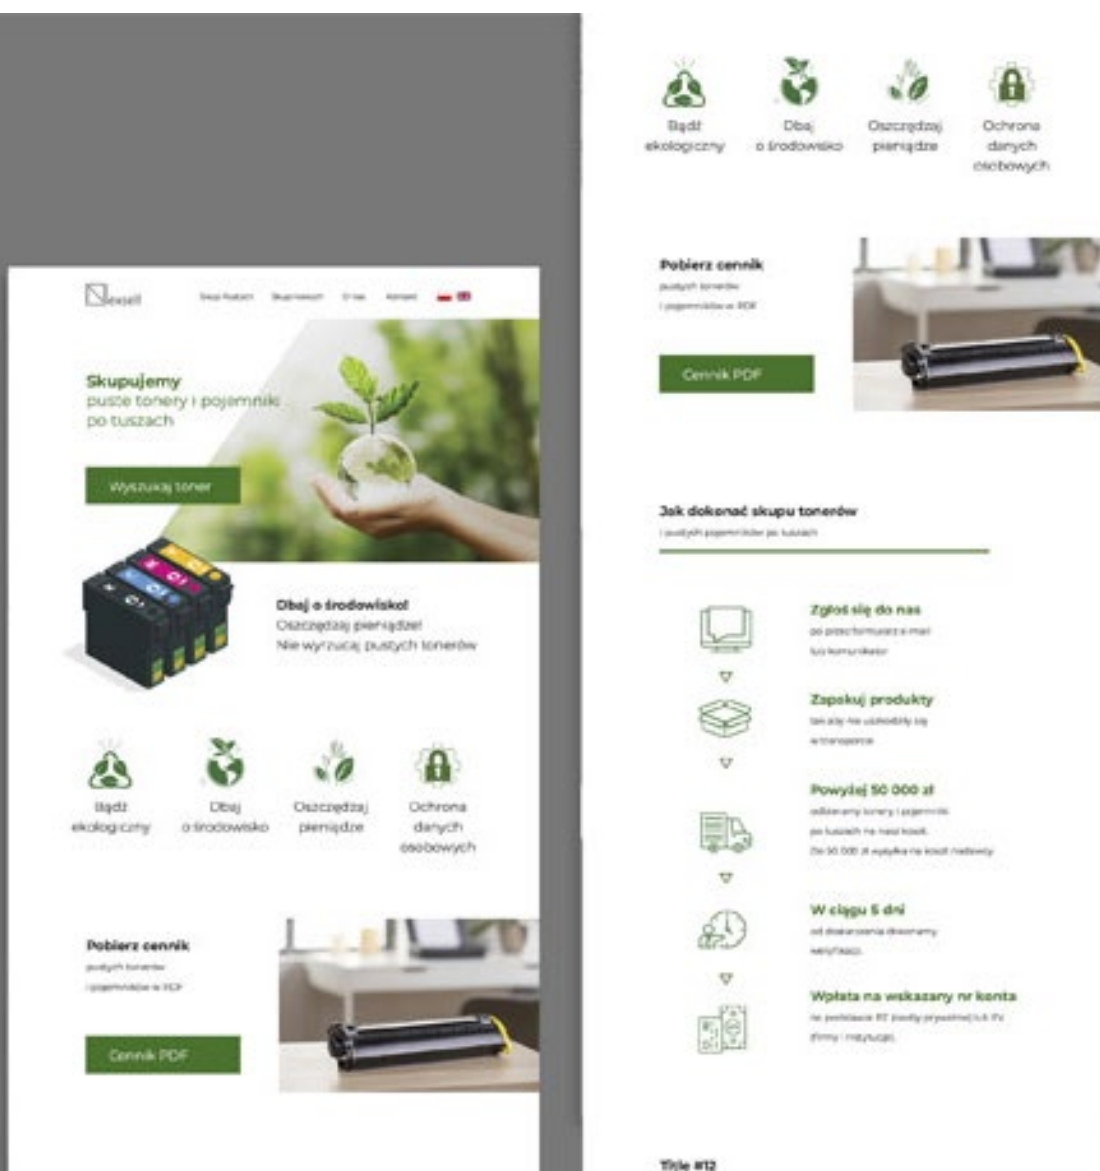

The Nexsell website is a modern and dynamic platform designed to present the company's business solutions and services. The site features a professional layout, intuitive navigation, and engaging visuals to enhance user experience and effectively communicate Nexsell's value proposition.

Nexsell | In1

Web Page Design

Responsive & Adaptive Design: Fully optimized for all devices, ensuring a seamless browsing experience on desktops, tablets, and smartphones.

Livewell Dentist | 1Flowwww

Web Page Design

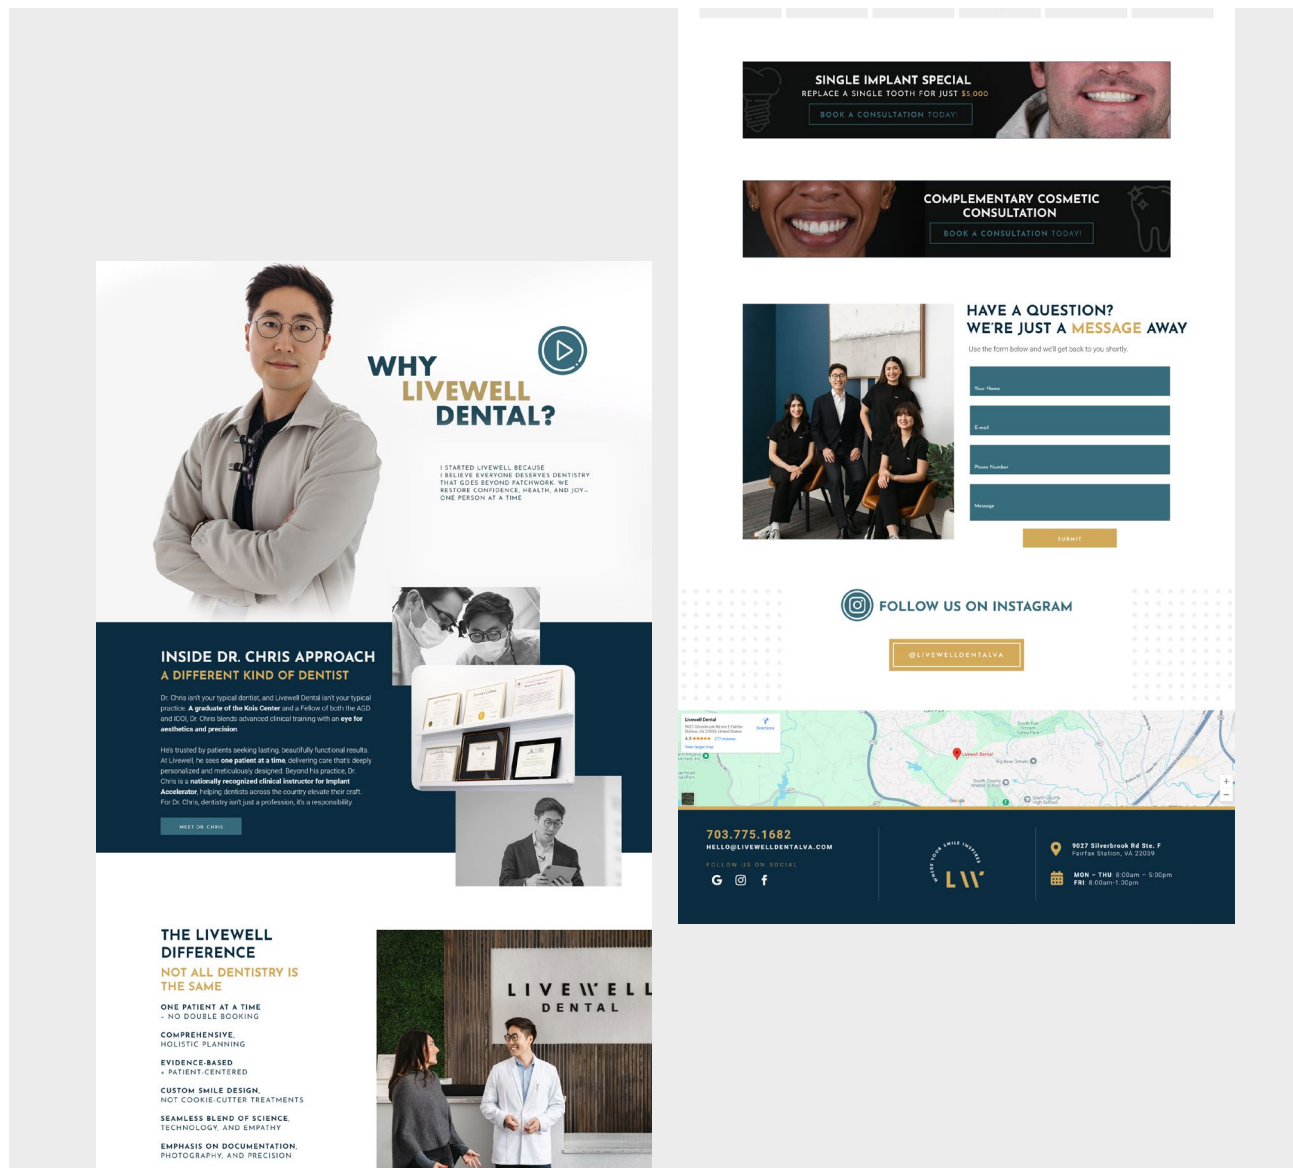

The website for Livewell Dental was designed for a modern dental practice focused on improving patients' quality of life through comprehensive and aesthetic dental care. The primary goal of the project was to build trust, highlight the professionalism of the team, and present the clinic's services in a clear, approachable, and user-friendly way.

Livewell Dentist | 1Flowwww

Web Page Design

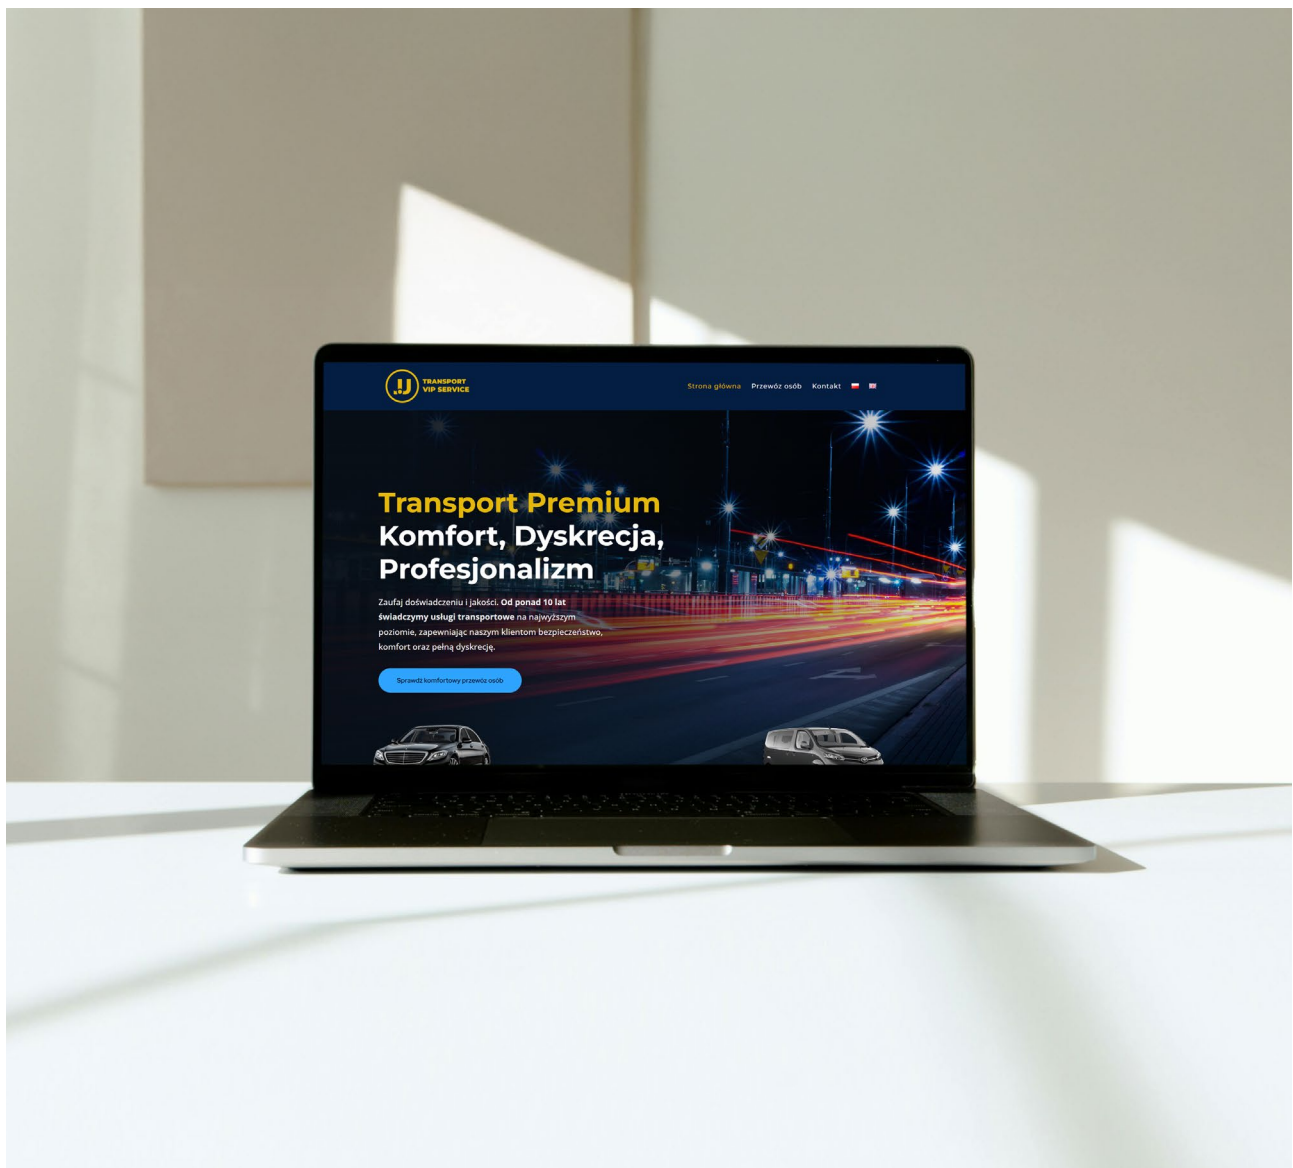

The visual style features a calm, modern color palette associated with cleanliness, comfort, and medical precision. Authentic photography of the team and patients adds a human and approachable tone, helping to establish credibility and emotional connection with visitors.

J.U Transport Vip Service

Web Page Design & Dev

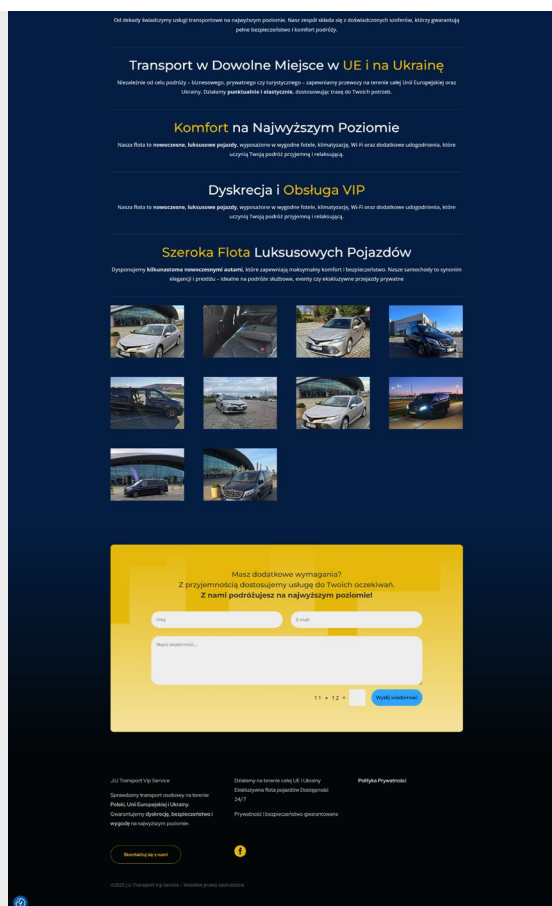

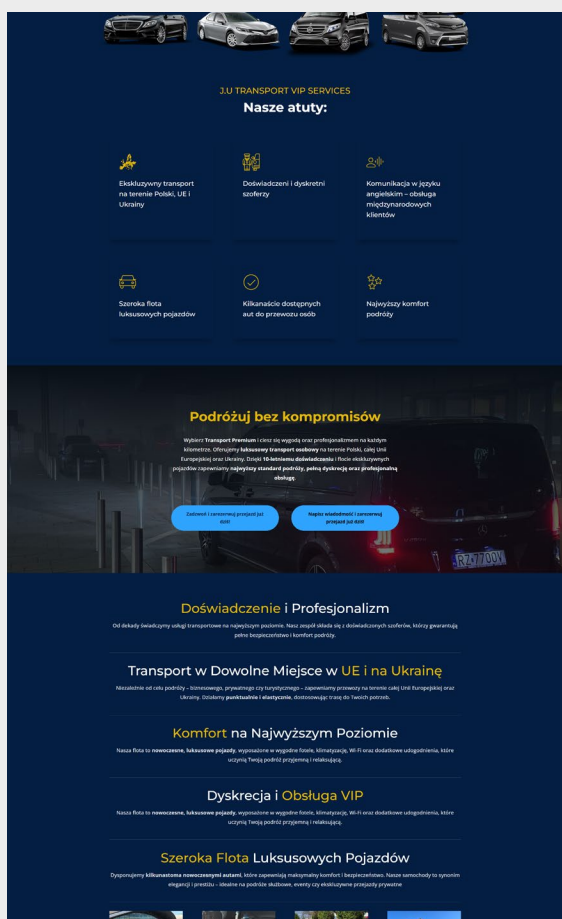

The website for J.U Transport VIP Service was designed and implemented as a complete digital solution for a premium transport company offering luxury passenger services. The main objective of the project was to communicate comfort, discretion, and professionalism, while clearly presenting the company's offer and encouraging direct customer contact.

J.U Transport Vip Service

Web Page Design & Dev

The visual design is based on a dark, elegant color palette combined with yellow accent elements, which emphasize the premium character of the brand and ensure strong visual contrast. Dynamic city night photography reinforces the association with mobility, reliability, and executive-class transportation.

Aeroklub Krakowski

Pilot's room - 3D concept

This 3D concept design presents a modern, functional, and engaging Aviation Club Lounge, carefully divided into multiple themed zones to enhance the experience of club members and aviation enthusiasts. The space is designed to foster community, relaxation, and inspiration, incorporating both practical and aesthetic elements tailored to pilots' needs.

Aeroklub Krakowski

Pilot's room - 3D concept

Coffee Room – A space to recharge before flights, featuring a lit-up refrigerator for a club-like atmosphere and motivational aviation-themed wall quotes. Relax Room – Designed for preparation and rest, equipped with comfortable bean bags, a cozy ambiance, and essential pilot materials. Game Room – A unique flight simulation area, designed to make users feel as if they are inside a real cockpit, enhanced with immersive airplane-themed visuals and doors on both sides for an enclosed experience.

Aeroklub Krakowski

Airplane simulator - 3D concept

This branding concept for a flight simulator container is designed to create a visually impactful and immersive experience, reinforcing the idea of professional pilot training in a safe and realistic environment.

Aeroklub Krakowski

Airplane simulator - 3D concept

The container serves as both a marketing tool and an entry point into the world of aviation, featuring bold visuals, aviation-inspired typography, and key messaging that resonates with aspiring pilots.
